Current week
Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life? (Response scale: 1 'not concerned at all' to 5 'very concerned')

- **economic situation**: 63% not concerned, 19% medium, 18% (very) concerned
- **social relationships**: 59% not concerned, 26% medium, 15% (very) concerned
- **physical health**: 68% not concerned, 18% medium, 14% (very) concerned
- **mental health**: 71% not concerned, 19% medium, 10% (very) concerned

Figures given in percentages
Basis: 1.004–1.008 participants
Perceived informedness about what is happening
How well or badly do you feel informed about what is happening with the novel coronavirus? *(Response scale: 1 ‘very bad’ to 5 ‘very good’)*

- **(very) good**: 65
- **medium**: 19
- **(very) bad**: 17

Figures given in percentages
Basis: 1,006 participants
Evaluation of media coverage
How do you evaluate the overall media coverage of the novel coronavirus?
(Response options: ‘downplaying’, ‘appropriate’, ‘exaggerated’)

- Appropriate: 64
- Exaggerated: 32
- Downplaying: 5

Figures given in percentages
Basis: 1,004 participants
Used channels of information
What channels do you use to inform yourself about what is happening with the novel coronavirus? (multiple selection)

- television: 81%
- radio: 64%
- internet (excl. social media): 61%
- personal contacts: 56%
- print media: 56%
- social media: 25%
- other: 7%
- I do not inform myself: 0%
Appropriateness of the measures for containment

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: 'not appropriate', 'appropriate')

- Mandatory distance: 90% appropriate, 10% not appropriate
- Mandatory use of masks: 84% appropriate, 16% not appropriate
- Cancellation of events: 83% appropriate, 17% not appropriate
- Limitation of the number of customers: 80% appropriate, 20% not appropriate
- Restriction in the cultural sector: 77% appropriate, 23% not appropriate
- Contact restriction: 71% appropriate, 29% not appropriate

Figures given in percentages
Basis: 993–1,011 participants
Protective measures of the participants
Which of the following measures have you taken to protect yourself or your family from the novel coronavirus? (multiple selection)

- Use covers for mouth and nose: 95%
- Comply with government regulations: 91%
- Keep more distance to other people: 89%
- Wash hands more thoroughly: 88%
- Meet friends or family less frequently: 72%
- Use disinfectant more frequently: 64%
- Leave home less frequently: 64%
- Use Corona-Warn-App: 31%
- Build up larger stocks: 19%
- Wear gloves: 14%
- Have food delivered more frequently: 6%
- Other: 6%
- I have taken no measures: 0%

Figures given in percentages
Basis: 1,011 participants
Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus? 
*(Response scale: 1 'not sure at all' to 5 'very sure')*

- 43% (very sure)
- 35% medium
- 22% not sure (at all)
Perceived probability of infection by transmission pathways

How high or low do you estimate the probability of being infected with the novel coronavirus via the following paths? (Response scale: 1 ‘very low’ to 5 ‘very high’)

- **proximity to other people**: 60% (very high), 24% (medium), 16% (very low)
- **door handles**: 40% (very high), 23% (medium), 37% (very low)
- **cash**: 26% (very high), 21% (medium), 53% (very low)
- **toys**: 24% (very high), 23% (medium), 54% (very low)
- **dishes and cutlery**: 15% (very high), 20% (medium), 65% (very low)
- **food**: 9% (very high), 22% (medium), 69% (very low)
- **pets**: 5% (very high), 14% (medium), 81% (very low)
- **clothing**: 5% (very high), 14% (medium), 80% (very low)

Figures given in percentages
Basis: 944–1.006 participants
Over time
Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life? (Response scale: 1 'not concerned at all' to 5 'very concerned') – Shown: response category ‘(very) concerned’ (values 4 + 5)

- Economic situation: 19% (Jun 23–24, Jul 07–08, Jul 21–22)
- Social relationships: 16% (Jun 09–10), 17% (Jun 23–24), 15% (Jul 07–08)
- Physical health: 13% (Jun 09–10), 14% (Jun 23–24), 14% (Jul 07–08)
- Mental health: 10% (Jun 09–10), 10% (Jun 23–24), 10% (Jul 07–08)

Figures given in percentages
Basis: 1.004–1.034 participants
Perceived informedness about what is happening

How well or badly do you feel informed about what is happening with the novel coronavirus? *(Response scale: 1 ‘very bad’ to 5 ‘very good’)*

*Survey every two weeks since June 2020*

Figures given in percentages

Basis Mar–May: 499–510 participants
Basis from Jun: 1.006–1.028 participants
Evaluation of media coverage
How do you evaluate the overall media coverage of the novel coronavirus?
(Response options: ‘downplaying’, ‘appropriate’, ‘exaggerated’)
Used channels of information

What channels do you use to inform yourself about what is happening with the novel coronavirus? *(multiple selection)*

- **television**: 85, 85, 81
- **radio**: 67, 65, 64
- **internet (excl. social media)**: 63, 56, 61
- **personal contacts**: 60, 57, 56
- **print media**: 59, 57, 56
- **social media**: 26, 26, 25
- **other**: 6, 7, 7
- **I do not inform myself**: 1, 0, 0

Figures given in percentages
Basis: 1.011–1.037 participants

Part of the questionnaire since June 2020
**Appropriateness of the measures for containment**

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: 'not appropriate', 'appropriate') – **Shown: response category ‘appropriate’**

- **cancellation of events**: 97 97 96 95 94 88 89 86 87 90 85 86 83
- **contact restriction**: 92 88 85 85 80 77 67 72 70 70 74 79 74
- **mandatory distance**: 90 88 82 83 82 73 78 79 80 88 84
- **mandatory use of masks**: 86 83 82 83 82 73 78 79 80 88 84

How were the data collected?

**Statistical population:** German-speaking population ages 14 years and over in private households in the Federal Republic of Germany

**Sampling:** Samples drawn at random from land line and mobile telephone numbers which can also include telephone numbers not listed in directories (in line with standards set by the Association of German Market Research Institutes – ADM)

**Data weighting:** Data was weighted according to gender, education, age, employment, size of city and German federal state to guarantee representativeness

**Method:** Telephone interview (CATI omnibus survey, Dual Frame)

**Presentation of results:** All figures given in percentages, rounding differences are possible, only valid responses were included (response option 'don't know' was excluded from all analyses)

**Conducted by:** Kantar
About the BfR

Do nanoparticles promote the occurrence of allergies? Does apple juice contain too much aluminium? The German Federal Institute for Risk Assessment, or BfR for short, is responsible for answering questions on all aspects of the health assessment of foods and feeds, consumer products and chemicals. Through its work, it makes a decisive contribution towards ensuring that food, products and the use of chemicals have become safer in Germany.

The Institute’s main tasks comprise the assessment of existing health risks and identification of new ones, the development of recommendations to limit risks and the transparent communication of this process. This work results in the scientific advice given to political decision makers. To help with the strategic alignment of its risk communication, the BfR conducts its own research in the field of risk perception. The Institute is independent in its scientific assessments, research and communication. The BfR belongs to the portfolio of the Federal Ministry of Food and Agriculture (BMEL).
