Figures given in percentages
Basis: 992–1.002 participants
Perceived informedness about what is happening
How well or badly do you feel informed about what is happening with the novel coronavirus? (Response scale: 1 ‘very bad’ to 5 ‘very good’)

Figures given in percentages
Basis: 1,000 participants
Evaluation of media coverage
How do you evaluate the overall media coverage of the novel coronavirus? (Response options: 'downplaying', 'appropriate', 'exaggerated')

Figures given in percentages
Basis: 993 participants
Used channels of information

How often do you use the following information channels to inform yourself about what is happening with the novel coronavirus? (Response options: ‘daily’, ‘several times a week’, ‘once a week’, ‘less than once a week’, ‘never’)

- **Television**: 63% daily, 20% several times/once a week, 16% less/never
- **Radio**: 55% daily, 20% several times/once a week, 25% less/never
- **Personal contacts**: 49% daily, 38% several times/once a week, 12% less/never
- **Internet (excl. social media)**: 37% daily, 27% several times/once a week, 36% less/never
- **Print media**: 32% daily, 19% several times/once a week, 49% less/never
- **Social media**: 21% daily, 11% several times/once a week, 69% less/never

Figures given in percentages
Basis: 1,002–1,009 participants
Appropriateness of the measures for containment

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: ‘not appropriate’, ‘appropriate’)

Protective measures of the participants
Which of the following measures have you taken to protect yourself or your family from the novel coronavirus?
(multiple selection)

- use covers for mouth and nose: 98%
- keep more distance to other people: 95%
- comply with government regulations: 94%
- wash hands more thoroughly: 92%
- meet friends and family less frequently: 82%
- use desinfectant more frequently: 77%
- leave home less frequently: 73%
- use Corona-Warn-App: 42%
- wear gloves: 17%
- build up larger stocks: 14%
- have food delivered more frequently: 10%
- other: 7%
- I have taken no measures: 0%

Figures given in percentages
Basis: 1.001 participants
Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus?

(Response scale: 1 'not sure at all' to 5 'very sure')

Figures given in percentages

Basis: 994 participants
Perceived probability of infection by transmission pathways

How high or low do you estimate the probability of being infected with the novel coronavirus via the following paths? (Response scale: 1 ‘very low’ to 5 ‘very high’)

- **proximity to other people**: 12% (very) low, 19% medium, 69% (very) high
- **door handles**: 36% (very) low, 25% medium, 39% (very) high
- **cash**: 48% (very) low, 25% medium, 27% (very) high
- **dishes and cutlery**: 61% (very) low, 19% medium, 20% (very) high
- **toys**: 54% (very) low, 28% medium, 18% (very) high
- **food**: 72% (very) low, 18% medium, 10% (very) high
- **pets**: 79% (very) low, 13% medium, 9% (very) high
- **clothing**: 78% (very) low, 15% medium, 7% (very) high

Figures given in percentages

Basis: 933–999 participants
Over time
Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life?

(Response scale: 1 'not concerned at all' to 5 'very concerned') – Shown: response category '(very) concerned' (values 4 + 5)

- **economic situation**
  - June: 19%
  - July: 18%
  - August: 22%
  - September: 24%
  - October: 21%
  - November: 22%

  - October: 18%
  - November: 12%
  - December: 18%

Figures given in percentages
Basis: 992–1,035 participants

Part of the questionnaire since June 2020
Perceived informedness about what is happening
How well or badly do you feel informed about what is happening with the novel coronavirus?
(Response scale: 1 ‘very bad’ to 5 ‘very good’)

* Survey every two weeks since June 2020

**Figures given in percentages**
Basis Mar–May: 499–510 participants
Basis from Jun: 993–1.032 participants
Evaluation of media coverage

How do you evaluate the overall media coverage of the novel coronavirus?
(Response options: ‘downplaying’, ‘appropriate’, ‘exaggerated’)

* Survey every two weeks since June 2020

* Figures given in percentages
  Basis Mar–May: 480–502 participants
  Basis from Jun: 971–1.019 participants
**Used channels of information**

How often do you use the following information channels to inform yourself about what is happening with the novel coronavirus?

(Response options: ‘daily’, ‘several times a week’, ‘once a week’, ‘less than once a week’, ‘never’) – **Shown: response category ‘daily’**

- **television**: 61% (daily), 63% (daily)
- **radio**: 55% (daily), 55% (daily)
- **personal contacts**: 49% (daily), 49% (daily)
- **internet (excl. social media)**: 36% (daily), 37% (daily)
- **print media**: 31% (daily), 32% (daily)
- **social media**: 23% (daily), 21% (daily)

Figures given in percentages

Basis: 994–1.009 participants

Part of the questionnaire since 27–28 October 2020
Appropriateness of the measures for containment I

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: ‘not appropriate’, ‘appropriate’) – Shown: response category ‘appropriate’

- **cancellation of events**: 94%, 96%, 96%, 96%, 97%, 97%, 97%, 97%, 94%, 88%, 89%, 86%, 87%, 88%, 88%, 83%, 87%, 80%, 77%, 70%, 70%, 71%, 79%, 77%, 79%, 76%, 75%, 70%, 70%, 70%, 71%, 77%, 75%, 70%, 79%, 81%, 77%

About the BfR

Do nanoparticles promote the occurrence of allergies? Does apple juice contain too much aluminium? The German Federal Institute for Risk Assessment, or BfR for short, is responsible for answering questions on all aspects of the health assessment of foods and feeds, consumer products and chemicals. Through its work, it makes a decisive contribution towards ensuring that food, products and the use of chemicals have become safer in Germany.

The Institute’s main tasks comprise the assessment of existing health risks and identification of new ones, the development of recommendations to limit risks and the transparent communication of this process. This work results in the scientific advice given to political decision makers. To help with the strategic alignment of its risk communication, the BfR conducts its own research in the field of risk perception. The Institute is independent in its scientific assessments, research and communication. The BfR belongs to the portfolio of the Federal Ministry of Food and Agriculture (BMEL).
