Current week
Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life?

(Response scale: 1 ‘not concerned at all’ to 5 ‘very concerned’)

Figures given in percentages

Basis: 986–1.002 participants
Perceived informedness about what is happening
How well or badly do you feel informed about what is happening with the novel coronavirus?
(Response scale: 1 ‘very bad’ to 5 ‘very good’)

- **(very) good**: 52
- **medium**: 27
- **(very) bad**: 21

Figures given in percentages
Basis: 995 participants
Evaluation of media coverage
How do you evaluate the overall media coverage of the novel coronavirus?  
(Response options: ‘downplaying’, ‘appropriate’, ‘exaggerated’)

- **appropriate**: 58%
- **downplaying**: 7%
- **exaggerated**: 35%

Figures given in percentages  
Basis: 965 participants
**Used channels of information**

How often do you use the following information channels to inform yourself about what is happening with the novel coronavirus? (Response options: ‘daily’, ‘several times a week’, ‘once a week’, ‘less than once a week’, ‘never’)

BfR-Corona-Monitor | 2–3 February 2021
## Protective measures of the participants

Which of the following measures have you taken to protect yourself or your family from the novel coronavirus? (multiple selection)

- Use covers for mouth and nose: **98%**
- Comply with government regulations: **92%**
- Keep more distance to other people: **91%**
- Wash hands more thoroughly: **89%**
- Meet friends and family less frequently: **83%**
- Leave home less frequently: **82%**
- Ventilate closed rooms more frequently: **79%**
- Use desinfectant more frequently: **68%**
- Use Corona-Warn-App: **37%**
- Build up larger stocks: **20%**
- Have food delivered more frequently: **15%**
- Other: **7%**
- I have taken no measures: **0%**

*Figures given in percentages
Basis: 1.001 participants*
Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus?

(Response scale: 1 ‘not sure at all’ to 5 ‘very sure’)

- (very) sure: 44
- not sure (at all): 22
- medium: 35

Figures given in percentages

Basis: 994 participants
## Perceived probability of infection by transmission pathways

How high or low do you estimate the probability of being infected with the novel coronavirus via the following paths?  
*(Response scale: 1 ‘very low’ to 5 ‘very high’)*

<table>
<thead>
<tr>
<th>Path</th>

How were the data collected?

**Statistical population:** German-speaking population ages 14 years and over in private households in the Federal Republic of Germany

**Sampling:** Samples drawn at random from land line and mobile telephone numbers which can also include telephone numbers not listed in directories (in line with standards set by the Association of German Market Research Institutes – ADM)

**Data weighting:** Data was weighted according to gender, education, age, employment, size of city and German federal state to guarantee representativeness

**Method:** Telephone interview (CATI omnibus survey, Dual Frame)

**Presentation of results:** All figures given in percentages, rounding differences are possible, only valid responses were included (response option ‘don’t know’ was excluded from all analyses)

**Conducted by:** Kantar
About the BfR

Do nanoparticles promote the occurrence of allergies? Does apple juice contain too much aluminium? The German Federal Institute for Risk Assessment, or BfR for short, is responsible for answering questions on all aspects of the health assessment of foods and feeds, consumer products and chemicals. Through its work, it makes a decisive contribution towards ensuring that food, products and the use of chemicals have become safer in Germany.

The Institute’s main tasks comprise the assessment of existing health risks and identification of new ones, the development of recommendations to limit risks and the transparent communication of this process. This work results in the scientific advice given to political decision makers. To help with the strategic alignment of its risk communication, the BfR conducts its own research in the field of risk perception. The Institute is independent in its scientific assessments, research and communication. The BfR belongs to the portfolio of the Federal Ministry of Food and Agriculture (BMEL).
