BfR Corona MONITOR

3–4 August 2021

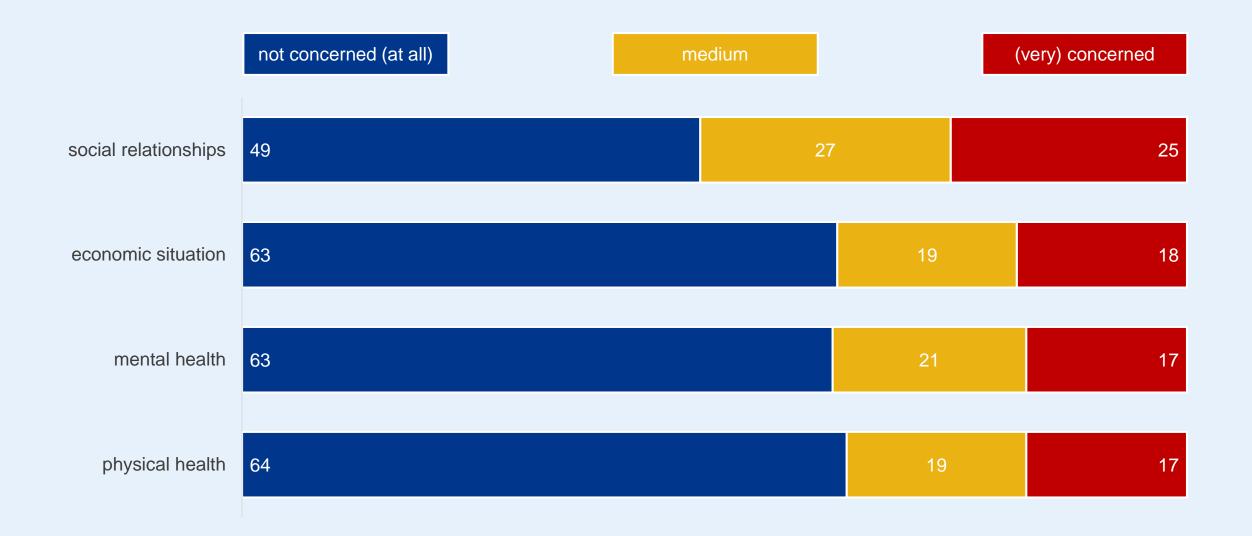

Current week

Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life? (Response scale: 1 'not concerned at all' to 5 'very concerned')

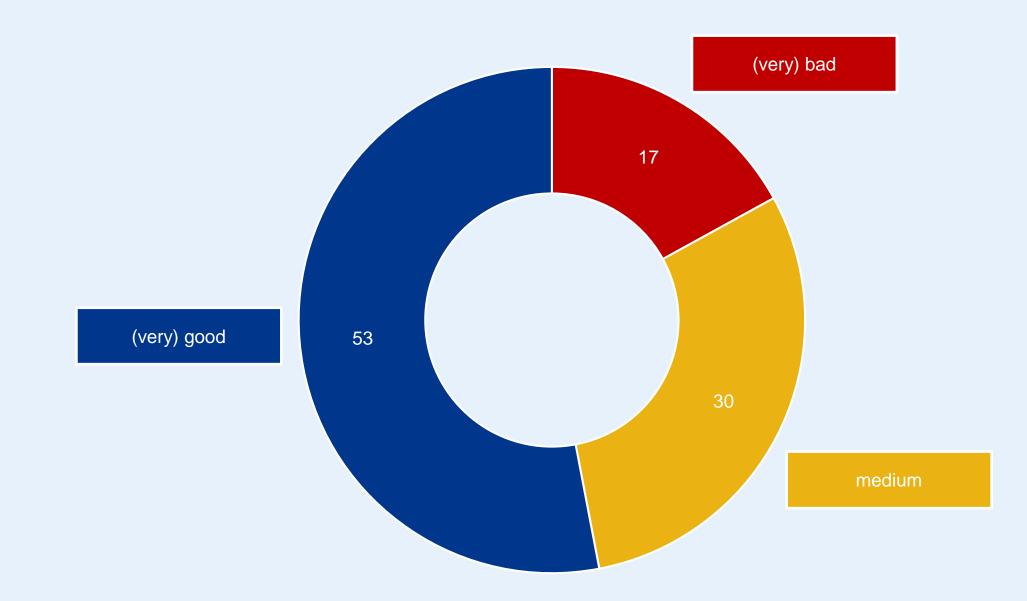

BfR-Corona-Monitor | 3–4 August 2021

Figures given in percentages Basis: 991–1.001 participants

Perceived informedness about what is happening

How well or badly do you feel informed about what is happening with the novel coronavirus? (Response scale: 1 'very bad' to 5 'very good')

BfR-Corona-Monitor | 3–4 August 2021

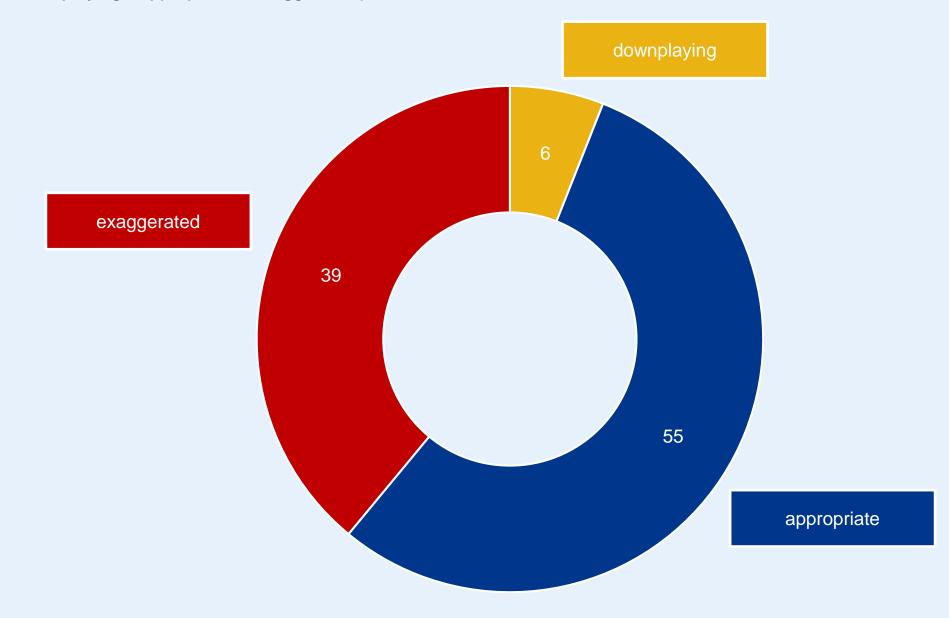

4

Figures given in percentages Basis: 1.002 participants

Evaluation of media coverage

How do you evaluate the overall media coverage of the novel coronavirus? (*Response options: 'downplaying', 'appropriate', 'exaggerated'*)

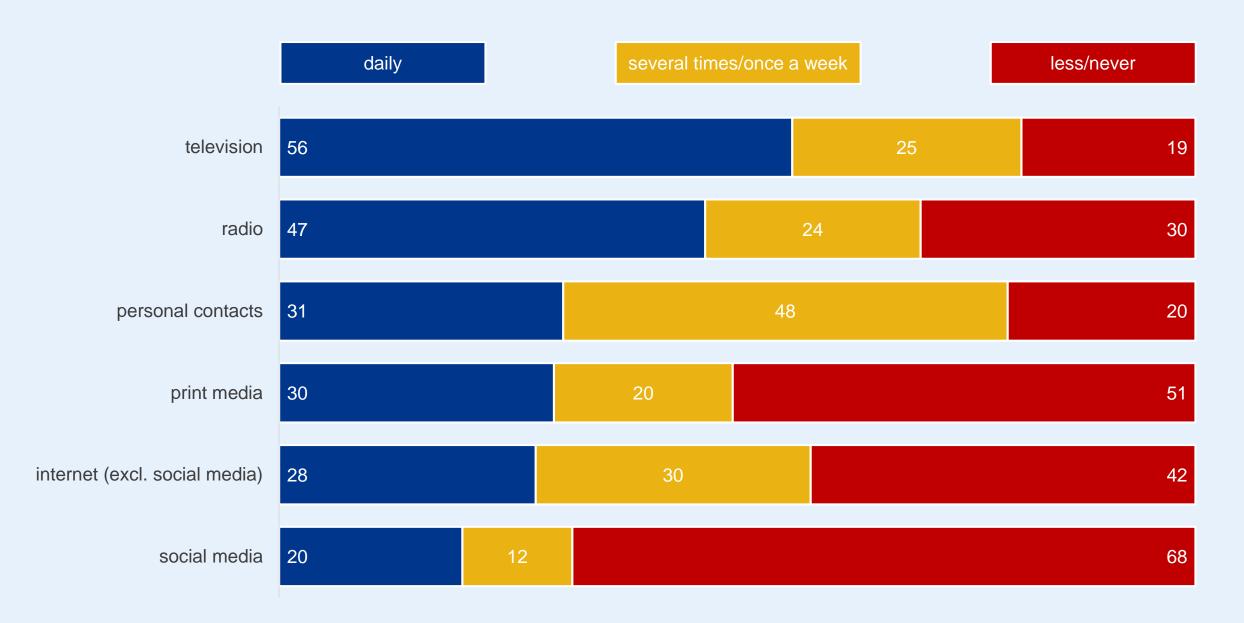

Figures given in percentages Basis: 984 participants 5

Used channels of information

How often do you use the following information channels to inform yourself about what is happening with the novel coronavirus? (Response options: 'daily', 'several times a week', 'once a week', 'less than once a week', 'never')

BfR-Corona-Monitor | 3–4 August 2021

6

Figures given in percentages Basis: 1.002–1.006 participants

Appropriateness of the measures for containment

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: 'not appropriate', 'appropriate')

BfR-Corona-Monitor | 3–4 August 2021

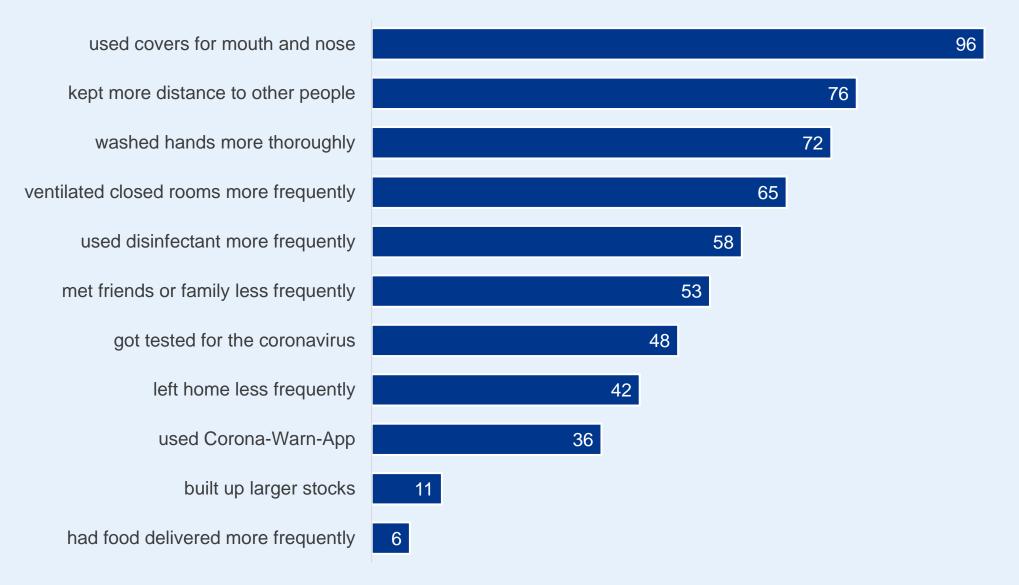

7

Figures given in percentages Basis: 965–1.000 participants

Current protective measures of the participants

Which of the following measures have you taken within the past 2 weeks to protect yourself or others from the novel coronavirus? *(multiple selection)*

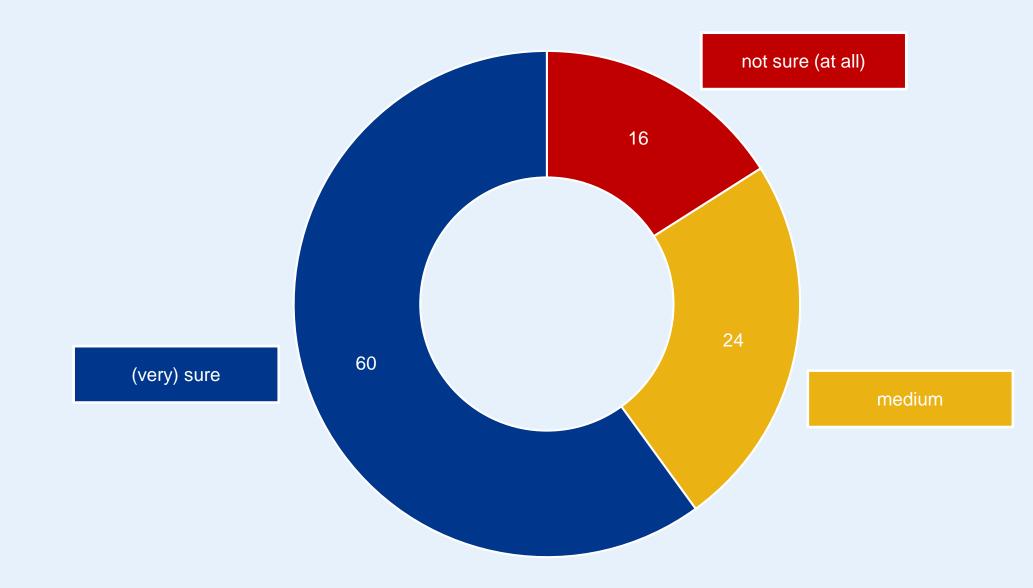

Figures given in percentages Basis: 991 participants 8

Perceived controllability of the risk of infection

How sure are you that you can protect yourself from an infection with the novel coronavirus? (Response scale: 1 'not sure at all' to 5 'very sure')

BfR-Corona-Monitor | 3–4 August 2021

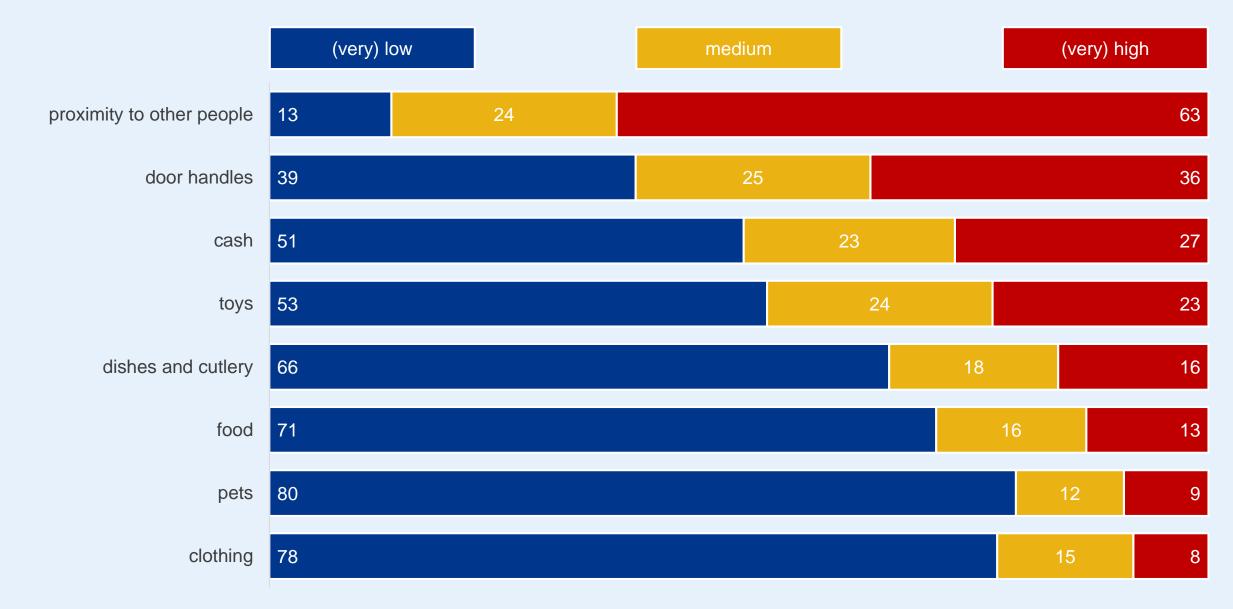

9

Figures given in percentages Basis: 992 participants

Perceived probability of an infection

How high or low do you estimate the probability of being infected with the novel coronavirus via the following paths? (Response scale: 1 'very low' to 5 'very high')

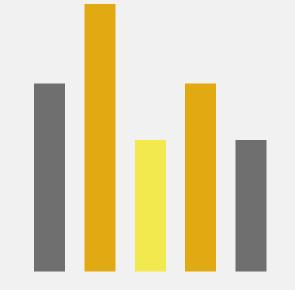

BfR-Corona-Monitor | 3–4 August 2021

10

Figures given in percentages Basis: 925–996 participants

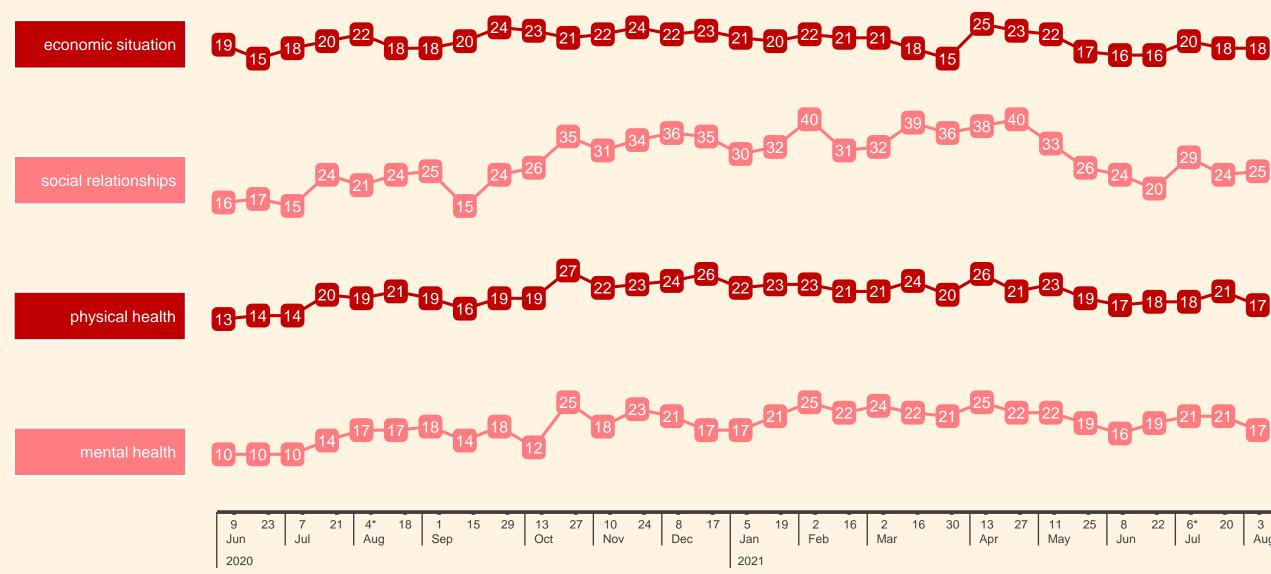

Over time

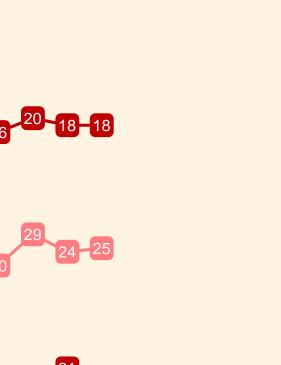

Concern about the impact of the novel coronavirus

To what extent are you personally concerned or not concerned about the impact of the novel coronavirus in the following areas of life? (Response scale: 1 'not concerned at all' to 5 'very concerned') – Shown: response category '(very) concerned' (values 4 + 5)

BfR-Corona-Monitor | 3–4 August 2021

un		Jul		Aug			Sep	

Figures given in percentages Basis: 980–1.035 participants

Perceived informedness about what is happening

How well or badly do you feel informed about what is happening with the novel coronavirus? (Response scale: 1 'very bad' to 5 'very good')

BfR-Corona-Monitor | 3–4 August 2021

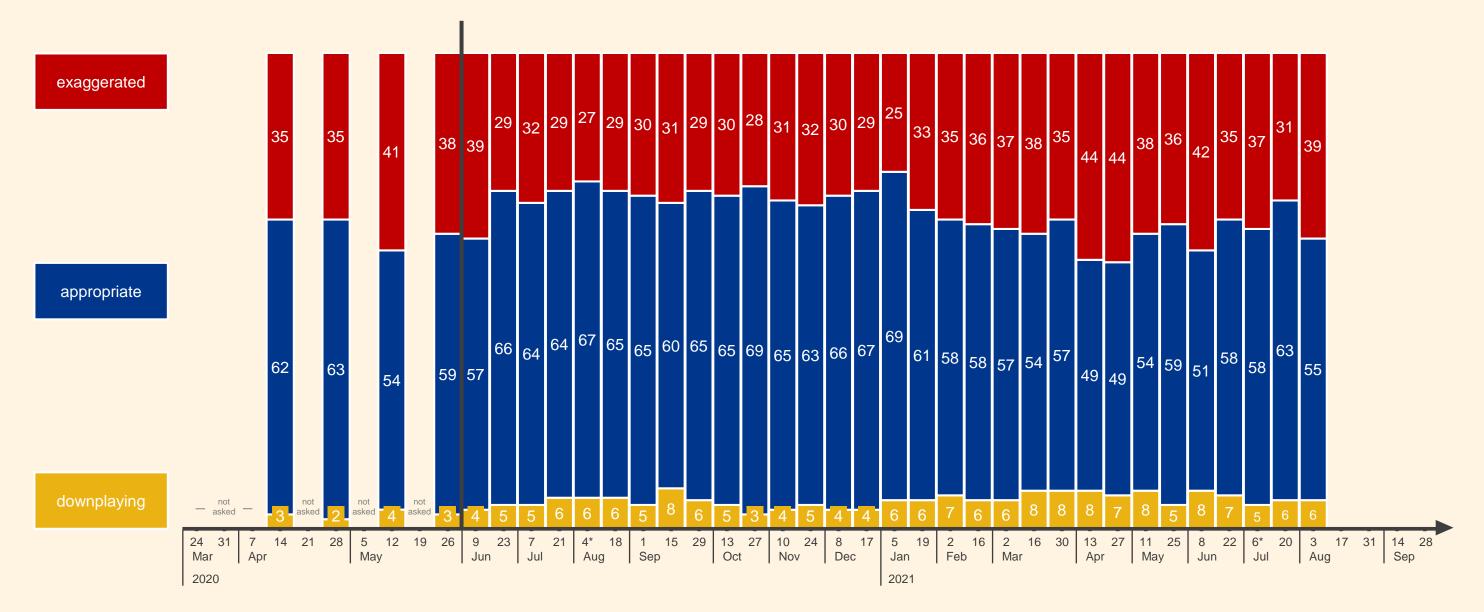

13

Figures given in percentages Basis Mar-May: 499-510 participants Basis from Jun: 988–1.032 participants

Evaluation of media coverage

How do you evaluate the overall media coverage of the novel coronavirus? (Response options: 'downplaying', 'appropriate', 'exaggerated')

BfR-Corona-Monitor | 3–4 August 2021

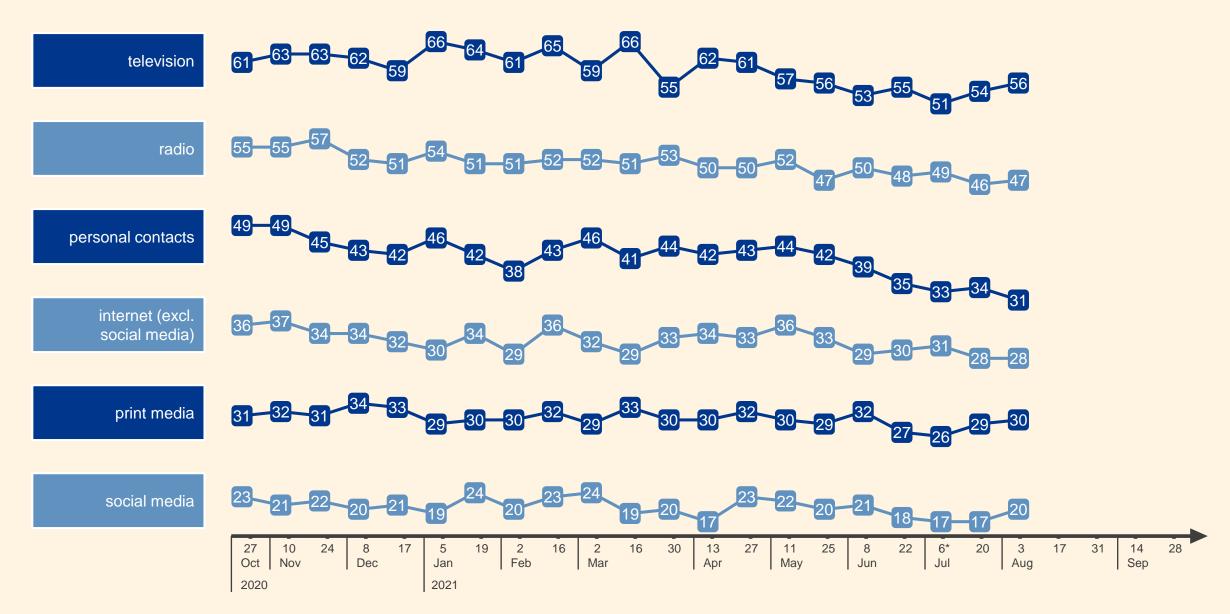

14

Figures given in percentages Basis Mar-May: 480-502 participants Basis from Jun: 954–1.019 participants

Used channels of information

How often do you use the following information channels to inform yourself about what is happening with the novel coronavirus? (Response options: 'daily', 'several times a week', 'once a week', 'less than once a week', 'never') – Shown: response category 'daily'

Part of the questionnaire since 27 October 2020; survey on two (* three) consecutive days; the first day of each survey is indicated

BfR-Corona-Monitor | 3–4 August 2021

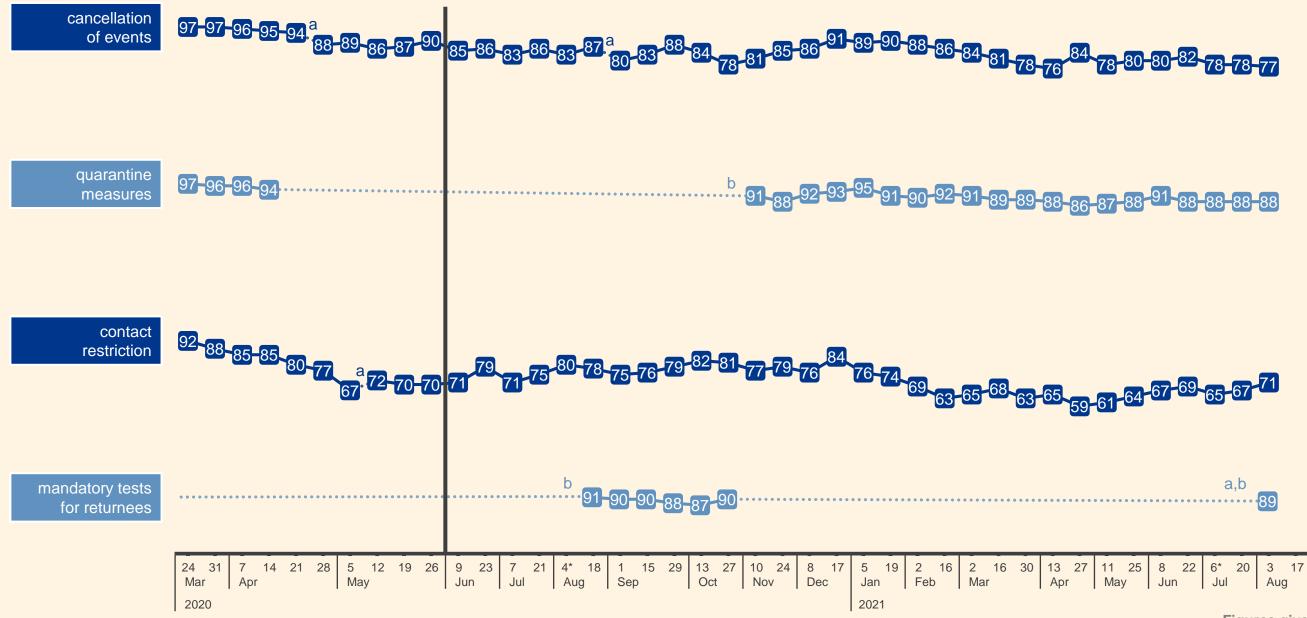

15

Figures given in percentages Basis: 983–1.024 participants

Appropriateness of the measures for containment I

How do you evaluate the following measures to contain the spread of the novel coronavirus? (Response options: 'not appropriate', 'appropriate') – Shown: response category 'appropriate'

Since June 2020 survey every two weeks on two (* three) consecutive days; the first day of each survey is indicated

^a Wording was adapted to the current situation at the time

^b Measure was added to the questionnaire (again) at the time indicated

BfR-Corona-Monitor | 3–4 August 2021

About the BfR

Do nanoparticles promote the occurrence of allergies? Does apple juice contain too much aluminium? The German Federal Institute for Risk Assessment, or BfR for short, is responsible for answering questions on all aspects of the health assessment of foods and feeds, consumer products and chemicals. Through its work, it makes a decisive contribution towards ensuring that food, products and the use of chemicals have become safer in Germany.

The Institute's main tasks comprise the assessment of existing health risks and identification of new ones, the development of recommendations to limit risks and the transparent communication of this process. This work results in the scientific advice given to political decision makers. To help with the strategic alignment of its risk communication, the BfR conducts its own research in the field of risk perception. The Institute is independent in its scientific assessments, research and communication. The BfR belongs to the portfolio of the Federal Ministry of Food and Agriculture (BMEL).
