

5th BfR Stakeholder Conference „Food Safety and Globalisation – Challenges and Chances“

On 2nd and 3rd June 2014, the 5th BfR Stakeholder Conference entitled “Food Safety and Globalisation – Challenges and Chances” will take place.

The event will focus on the question how, against the background of increasing liberalisation of the global trade, it will be possible to guarantee food safety in future.

Taking cultural peculiarities in the area of nutrition as a starting point, the discussion shall straddle such issues as different regulation systems and resulting risk, safety and prevention concepts and even include questions of risk perception and risk communication in comparative international perspective.

Moderation: Professor Dr. Katharina Seuser
