

Dr. Steven C. Olsen

National Animal Disease Center, United States Department of Agriculture, Ames (IA), USA

Dr. Olsen is with the Agricultural Research Service branch of the U.S. Department of Agriculture and has worked on *Brucella* for over 20 years. His research focus is on vaccines and immunologic responses, and in particular vaccines and delivery methods for addressing brucellosis in wildlife reservoirs. In addition to his research assignment in *Brucella*, he also manages projects on leptospirosis, tuberculosis and Johne's disease.
