

International Commission on Trichinellosis Student Research Award

The International Commission on Trichinellosis wishes to encourage the career development of talented students by supporting and recognizing their contributions to research on *Trichinella* and trichinellosis. To do so, the ICT will make a Student Research Award for the best research paper submitted by a current, or recently graduated, student for presentation at the International Conference on Trichinellosis (ICT). Nominations and applications for the ICT Student Research Award may be made by research/thesis advisors, by professional colleagues familiar with the work of the nominee, or directly by the student.

The Award

The ICT will present one or more Student Research Awards at the International Conference on Trichinellosis. These awards will include a Certificate signed by the President of the ICT, a monetary prize of 1000 USD to be used as financial support to attend the International Conference. The Student Research Award recipient(s) will present his/her research during the Conference and will publish that research in the ICT Proceedings.

At the discretion of the selection committee additional ICT Honorable Mention Awards will be made and recipients will have Conference registration waived.

Eligibility

The ICT Student Research Award competition is open to undergraduate and graduate students who are conducting, or have conducted, research on the subject of *Trichinella* or trichinellosis. Areas of study may include, but are not limited to: phylogeny; genetics; biology; immunology; detection and diagnosis of infection; epidemiology and control in animals; and, pathology, treatment and prevention in humans.

Certification of student status must be provided by the institution where the student conducted the research. While a nominee/applicant may have graduated at the time the award is made, he/she must not have graduated more than 12 months prior to the award application deadline.

Nomination Process

Nominations and applications for the ICT Student Research Award may be made by a research/thesis advisor, by a professional colleague familiar with the work of the nominee, or by the student. Nominations/applications must be submitted using the ICT Student Research Award nomination/application form. The nomination package must include the following:

- An extended abstract prepared by the student, describing his/her research¹
- Three letters of support which discuss the quality and importance of the student's research, the student's other contributions to research on *Trichinella* and trichinellosis, and student's potential for future contributions in the field
- A letter from the most recently attended university, certifying student status

Complete nomination/application packages should be mailed to:

PD Dr. Karsten Nöckler, Secretary General, ICT
Federal Institute for Risk Assessment
Diedersdorfer Weg 1
12277 Berlin, Germany

Tel.: +49-30-18412-2053, Fax: +49-30-18412-2000

E-Mail: karsten.noeckler@bfr.bund.de

Selection Committee

A committee appointed by the ICT President will evaluate all nominations and will make a recommendation to the ICT Executive Committee for the Student Research Award.

¹ The extended abstract must include a title, a list of co-authors of the research and text including an introduction, materials and methods, results and discussion sections. Citations may be included in the text, but no references. The extended abstract should be single spaced and should not exceed two pages. If selected, this abstract will form the basis of the presentation and the manuscript that the student will prepare for the International Conference of Trichinellosis.
