Date

**Notification of modification to a mixture  
to a biocidal product**

(Notification of modification under § 16 e para 1 Chemicals Act)

A. Notifier's name and address

Trade name of the mixture/biocidal product

B. Notification No. assigned by the Federal Institute for Risk Assessment

C. Marketing of the mixture/biocidal product will be discontinued  
from (final date)

The mixture/biocidal product in the form described below will be marketed for the first time  
from

D. Data under 1-13 of the first notification form that have become modified since the last notification. Modified concentrations need to be stated only if they exceed 10 % of the value stated (relative) for substances under 3a), and 20 % of the value stated (relative) for substances under 3b). If a concentration range listed under 3a) or 3b) has been used for description, modifications need to be stated only if the concentration range has changed. If a concentration range has been stated to account for variations due to the production process, a notification of modification is required if the concentration range stated has changed.

E. Characteristics permitting an unequivocal distinction between the modified mixture/biocidal product and the original one (e.g. packaging code, colour)
