

The German Federal Institute for Risk Assessment (BfR) is the national institute which prepares scientific reports and opinions on questions of food, feed and chemical safety and consumer health protection in Germany on the basis of internationally recognised scientific assessment criteria. It advises the Federal Government and other institutions and interest groups in these areas. The BfR conducts its own research on topics that are closely linked to its assessment tasks. It is an institution with legal capacity within the portfolio of the Federal Ministry of Food and Agriculture (BMEL).

The following three-year position is immediately available in the risk communication department within a junior research group on the topic of trust in regulatory scientific organizations:

PhD student researcher on the topic of science participation (f/m/d)

Reference number: 2967/2021 | Salary group 13 TVöD

The employment is based on 65 % of full-time weekly working hours (currently 25.35 h). Fixed-term employment is based on the German "Wissenschaftszeitvertragsgesetz".

The candidate is envisioned to obtain a doctoral degree through this employment. The employment is part of a newly established junior research group on the topic of trust in regulatory scientific organizations. Aim of the research group is to study the effects of structural, processual, strategic and individual factors on the construction of trust in the context of regulatory science. **The PhD project will focus on the effects of (digital) participation on trust building processes. It will be supervised by Professor Dr. Hans-Liudger Dienel at the Technical University Berlin, Chair for Work, Technology and Participation.**

Participation in BfR's PhD program is mandatory. The program aims to convey scientific and methodological knowledge. It offers the opportunity to present the progress of the PhD project in regular internal events and to benefit from scientific exchange.

Tasks:

- Literature reviews on the topics of regulatory science, trust in organizations, public engagement and digitalization
- Case studies of different engagement processes with a focus on digital participation within and outside Germany
- Comparative evaluation of the case studies with a focus on qualitative data analysis
- Publication of research results in scientific journals
- Presentations of research results at scientific events
- Contributions to the development of research proposals

Requirements:

- University degree (master's, diploma (university) or a comparable university degree) in sociology, political science, business administration or a similar discipline
- Familiarity with literature on public engagement, in particular digital participation
- Experience in computer aided qualitative data analysis, ideally using MAXQDA software
- Experience in computer aided literature management, ideally using Citavi software
- Knowledge of risk and science studies as well as quantitative data analysis
- Very good knowledge of written and spoken German and English
- Handling of standard IT applications, conscientious work ethic, flexibility, resilience and ability to work in a team
- Willingness to travel and conduct field work abroad

What we can offer you:

- trust-based work time
- 30 days' annual leave (based on a 5-day week)
- Mobile working opportunities
- Excellent links to the public transport network
- Wide range of further training opportunities
- Travel pass
- VBL occupational pension
- Capital-forming benefits
- AWO-Familienservice/Family Service

The place of employment is Berlin.
