- Health risk assessment of nicotine pouches (No. 23/2022)
“The protection of human health is at the centre of our work.”
Dear readers

The year 2022 was a special one for the German Federal Institute for Risk Assessment (BfR): We celebrated our 20th anniversary with numerous activities and events such as the interactive plant maze “BfR Nectar Hectare” and the BfR Knowledge Dialogue on the subject of trust.

The anniversary also saw the Institute awarding outstanding research projects. The “BfR beacon projects” featured research on phages combating bacteria, on benefits and risks of a plant-based diet, and on perceived risks around microplastics.

The “BfR in brief” format presents the facts and figures of the 2022 reporting year at a glance. Are you curious about the projects and publications behind the figures? You will find more detailed information on the BfR website. And if you are interested in the BfR’s core research areas and contents in 2022, you can read about them in our science magazine BfR2GO.

Professor Dr Dr Andreas Hensel, President

How can food, chemicals, cosmetics, toys and many other everyday products be made as safe as possible? The German Federal Institute for Risk Assessment – BfR for short – provides the answers.

Identify Risks – Protect Health

The BfR was founded in 2002 to strengthen consumer health protection in Germany. As a federal authority with legal capacity within the portfolio of the Federal Ministry of Food and Agriculture, it advises the federal government and German federal states (“Laender”) on food and feed safety issues and on the safety of chemicals and products.

The BfR's main tasks include assessing existing health risks and identifying new ones, preparing recommendations on risk mitigation and communicating this process transparently.

All working areas of the BfR – science, assessment, communication and administration – have been certified in accordance with quality standard DIN EN ISO 9001 since 2010.

At the BfR, there are also National Reference Laboratories under Regulation (EU) 2017/625 in the domains of food and feed safety and food hygiene. This means that the BfR is part of an EU-wide network for improved food monitoring.

Networks and cooperation

The BfR is supported in its risk assessment and risk communication by an independent scientific expert network made up of 13 commissions and is advised in its strategic focus by the Scientific Advisory Board.
Work areas

Food and feed safety
Be it ingredients or additives, residues, contaminants or germs and parasites – on the basis of international recognised criteria, the BfR assesses food and feed with regard to toxicological, microbiological and nutritional aspects.

Product safety
The BfR investigates ingredients and their release from products such as cosmetics, toys, clothing or food packaging and containers, and assesses whether the contained substances could be a hazard to human health.

Chemical safety
The BfR also assesses health risks of chemicals, plant protection products, biocide products and hazardous materials to quickly identify undesirable effects.

Risk communication
The BfR examines the risk perception and risk behaviour of the population. To inform the public about health risks, the BfR talks to various stakeholders in society.

Alternatives to animal experiments
The BfR performs the tasks of the “German Centre for the Protection of Laboratory Animals (Bf3R)” and coordinates all activities countrywide with the goal of restricting animal experiments and ensuring the best possible care for laboratory animals.
Partnerships exist in the form of institutional cooperations or joint research projects. Scientists at the BfR actively contribute to the work in a variety of bodies. The institutional exchange between experts is also becoming more important.

Participation in bodies

- **334** national bodies
- **47** Bodies of the Federal Office of Consumer Protection and Food Safety (BVL)
- **151** Bodies of other institutions
- **84** Federal government-federal state (“Laender”) bodies
- **52** Federal bodies
- **631** BODIES IN WHICH BfR EMPLOYEES ARE OFFICIALLY INVOLVED:

**190** European level ...

- Bodies of the European Commission 59
- Bodies of the European Food Safety Authority (EFSA) 45
- Bodies of the European Chemicals Agency (ECHA) 33
- Bodies of other European organisations 53

**107** Worldwide ...

- WHO/FAO: Bodies of Codex Alimentarius 18
- WHO/FAO: Other bodies 1
- Bodies of other United Nations specialised agencies 13
- OECD bodies 54
- Other bodies involved in global standardisation activities 21

[www.bfr.bund.de/en > The Institute > Cooperation](http://www.bfr.bund.de/en > The Institute > Cooperation)
The BfR works in close partnership with the European Food Safety Authority (EFSA) and the European Chemicals Agency (ECHA). As the interface between EFSA and the various national food and feed safety authorities, the EFSA Focal Point at the BfR is entrusted with scientific coordination work and the exchange of information. In addition, the BfR cooperates with 53 national, international, governmental and non-governmental institutions on all continents* and advises on the establishment of official risk assessment structures.

### EFSA Focal Point

Scientific coordination and information exchange in 2022 (■) and 2021 (■)

- **Requests for information from EU Member States**: 5/40
- **EFSA Focal Point newsletters**: 26/25
- **EFSA surveys and surveys from other institutions**: 10/14
- **EFSA consultations**: 14/13
- **Expert appointments**: 15/5
- **Capacity development trainings**: 2/1

### International Affairs

- **Panel meetings**: 14
- **Visitor groups (Delegations to the BfR)**: 9
- **BfR delegations abroad**: 3
- **Capacity development trainings**: 9
- **Requests from partners**: 16

### Capacity building

1. **BMZ-funded project for technical cooperation in Tunisia**
   - **Time period**: 2021–2025
   - **German project partner**: Federal Office of Consumer Protection and Food Safety (BVL)
   - **Objective**: Establishing and sustainably strengthening the respective Tunisian authorities in the areas of food safety and consumer health protection

2. **BMZ-funded project: Boosting Uganda’s investments in Livestock Development (BUILD)**
   - **Time period**: 2019–2023
   - **Project partners**: International Livestock Research Institute (ILRI) and 4 German partners (including BfR)
   - **Objective**: Strengthening of existing structures for animal health and zoonoses control in Uganda

---

* 4 international organisations, 3 in Africa, 4 in North and South America, 11 in Asia, 31 in Europe (EU 27, EU candidate countries, EFTA Member States, Russia [Currently projects and programmes with state participation from Russia and Belarus are suspended, subject to compliance with legal framework conditions. / BMBF, announcement 17.03.2022])

---

[i](//www.bfr.bund.de/en /The Institute > Cooperation > International cooperation)
One of the BfR’s key competences is independent, application-orientated and cause-related research. The topics are closely related to its assessment tasks. One aim is to close knowledge gaps. Another is to constantly expand the Institute’s scientific expertise in risk assessment and risk communication independent of economic, political and societal interests. The BfR is actively involved in numerous national and international research projects.

### Third-party funded projects

**THIRD-PARTY FUNDING IN 2022 AMOUNTED TO 9.6 million euros.**

**Junior research groups**

Junior research groups provide young scientists with research and scientific qualification opportunities shortly after completing their PhD. In doing so, the BfR specifically boosts core research areas and junior scientists.

**Study centres**

The study centres provide long-term prioritisation in strategically important areas of the BfR and bundle technical expertise on interdepartmental topics.
Personnel and training

90
NEW APPOINTMENTS PER YEAR, OF WHICH 4 ARE TRAINEES

Training professions

- Laboratory chemist
- Office management clerk
- Animal carer
- Plant mechanic
- Electronic technician
- Laboratory biologist
- IT specialist

Budget

Income (in thousands of euros)

- Third-party funding raised: 9,624 (2022), 6,740 (2021)
- Refund (subsidy) from BMEL: 118,740 (2022), 110,723 (2021)
- Administrative and other income: 871 (2022), 2,035 (2021)

Expenditure (in thousands of euros)

- Personnel expenditure: 70,776 (2022), 70,776 (2021)
- Material administrative expenditure: 4,909 (2022), 4,909 (2021)
- Initial and further training: 337,567 (2022)
- Public relations work, publishing and documentation: 1,321,891 (2022)
- Conferences, trade fairs, exhibitions: 571,138 (2022)

In 2022, the BfR spent approximately 130 million euros.

Selected expenditure

- Scientific collections and libraries: 522,649 €
- Initial and further training: 337,567 €
- Public relations work, publishing and documentation: 1,321,891 €
- Conferences, trade fairs, exhibitions: 571,138 €
Consumer protection to go

Twice a year, the compact and knowledge-packed BfR2GO scientific magazine provides current and well-founded information on the research on and assessment of possible health risks of food and feed, chemicals and consumer products. Order, subscribe to or download the magazine free of charge at: www.bfr.bund.de/en
