

LUXEMBOURG (LUX)

Population: 395 000

Area: 2 586 km²

The designations and the presentation of material on this map of the Member States of the WHO European Region (as at 31 July 1997) do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines represent approximate border lines for which there may not yet be full agreement.

1. General information

The Regulations of 29 April 1983 (Article 17) concerning the profession of physicians, dentists and veterinarians require that all physicians practising medicine or dental medicine in Luxembourg notify all cases of infectious or communicable diseases which are subject to compulsory notification. The notifiable diseases list has been compiled by the Minister of Health in May 1983. The Regulations of 21 November 1980 concerning the organization of the Health Administration stipulate in article 4 (2) that the Health Inspection division is in charge of public health protection with respect to environmental hygiene as well as surveillance and prevention of communicable diseases.

2. Statutory notification

Table LU 1

Notified cases of foodborne diseases LUXEMBOURG 1993 - 1998
